

## Net metering in Canada - Outside Ontario & Alberta

**Commercial and Community Net Metering programs allow businesses, organizations and asset owners to get greater returns on their solar**

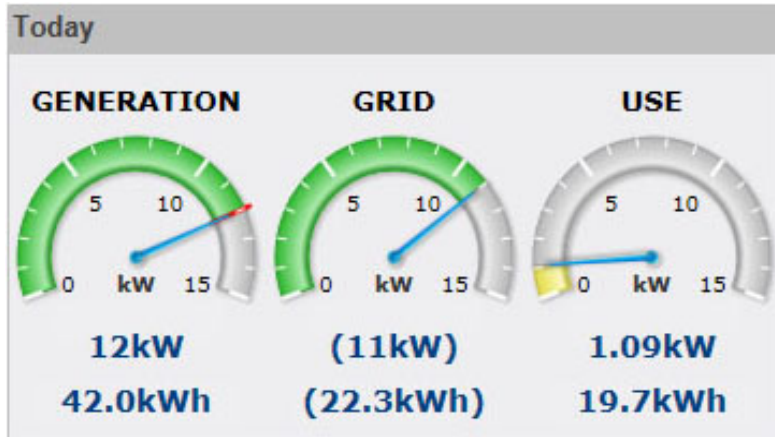

With it seeming like all of the talk with Solar in Canada is centered around Alberta and Ontario, what is going on in the rest of Canada?

Well, if you didn't know – many other provinces have Net Metering programs in one form or another, with a few supporting projects up to 100KWp.

**Use Cachelan SolarVu and NRG Pilot to monitor your next Net Metering Project!**

*See how solar generation offsets grid power as consumption changes throughout the day.*

### NET METERING IN CANADA

Province	System Size
<a href="#">Saskatchewan</a>	100kw
<a href="#">British Columbia</a>	100kw
<a href="#">New Brunswick</a>	100kw
<a href="#">Quebec</a>	50kw

Last 7 Days - From Jun 30, 2016 To Jul 06, 2016

	Import	Export	Net
Cost/(Credit)	\$39.27	(\$101)	(\$62.06)
Energy	172kWh	(443kWh)	(271kWh)

SolarVu® and NRG Pilot portals support Net Metering and includes features to help track building use.
